Specification Comparison Chart

-						
Test Parameter	9000 Series AAMA 2603-22	10000 Series AAMA 2604-22	11000 Series AAMA 2605-22			
	1-Year	5-Year	10-Year			
Pretreatment	Multi stage cleaning and pretreatment system	Multi stage cleaning and pretreatment system, chrome and non-chrome	Multi stage cleaning and pretreatment system, chrome and non-chrome			
Pretreatment Coating Weight	Non specified	Chrome 30mg/ft ² minimum	Chrome 40mg/ft ² minimum			
Film Thickness	2-4 mils	2-4 mils	2-4 mils			
Repairability	See film touch up and repair procedures					
Sealant Compatibility	Meet performance requirements of AAMA 800 sealant specification					
Hardness	Н-2Н	Н-2Н	Н-2Н			
	Values represent TCI product characteristics					
Dry Adhesion		No loss of adhesion				
Wet Adhesion		No loss of adhesion				
Boiling Water Adhesion		No loss of adhesion				
Impact Resistance	N	lo film removal on min. 3 mm deformation				
Abrasion Resistance	N/A	Abrasion coefficient \geq 20 min	Abrasion coefficient \geq 40 min			
Muriatic Acid		No change after 15 minute spot test				
Mortar Resistance	No adhesio	on loss or appearance change after 24 hou	r pat test			
Nitric Acid Resistance	N/A	5 DE max color change afte	r 30 minute vapor exposure			
Detergent	No ch	ange or adhesion loss after 72 hour imme	rsion			
Window Cleaner	N/A	No change or adhesion lo	ss after 24 hour spot test			
Humidity Resistance	1,500 hours: no more than "few" blisters size 8, figure #4 ASTM D 714	3,000 hours: no more than "few" blisters size 8, figure #4 ASTM D 714	4,000 hours: no more than "few" blisters size 8, figure #4 ASTM D 714			
Corrosion Resistance	1,500 hours of salt solution: minimum rating of 7 on scribe or cut edges: minimum blister rating of 8 in the field (ASTM D 1654) ASTM D 714	1,500 hours of cyclic corrosion per ASTM G85, Annex 5: minimum rating of 7 on scribe or cut edges: minimum blister rating of 8 in the field (ASTM D 1654)	2,000 hours of cyclic corrosion per ASTM G85, Annex 5: minimum rating of 7 on scribe or cut edges: minimum blister rating of 8 in the field (ASTM D 1654)			
Outdoor Resistance	1 year south Florida: maintain film integrity; no adhesion loss, slight chalking or fading	5 years south Florida: maintain film integrity; 5 DE (Hunter) maximum color change; chalking (ASTM D 4214) \leq 8; gloss retention \geq 30%; erosion resistance less than 10% film loss	10 years south Florida: maintain film integrity; 5 DE (Hunter) maximum color change; chalking (ASTM D 4214) ≤ 8 ; gloss retention $\geq 50\%$; erosion resistance less than 10% film loss

Surface Type					
S 🔶	 S Smooth T Textured A Anodized M Metallic 			WHERE YOUR WORLD MATTERS	

TCI's TruDurance architectural powder coatings have outstanding long-term durability, including excellent color and gloss retention. In addition, these products exhibit impressive corrosion, mar, and scratch resistance as well as over-bake stability on the applicators line. Our products are environmentally responsible and offer a great alternative to other coating options. The 10,000 series products are AAMA 2604 quality, 11,000 series are AAMA 2605 and products can be matched in TGIC-free chemistry at your request. TCI also offers quick turnaround times on color matches and small batch orders.

For more information please contact your TCI Sales Representative.

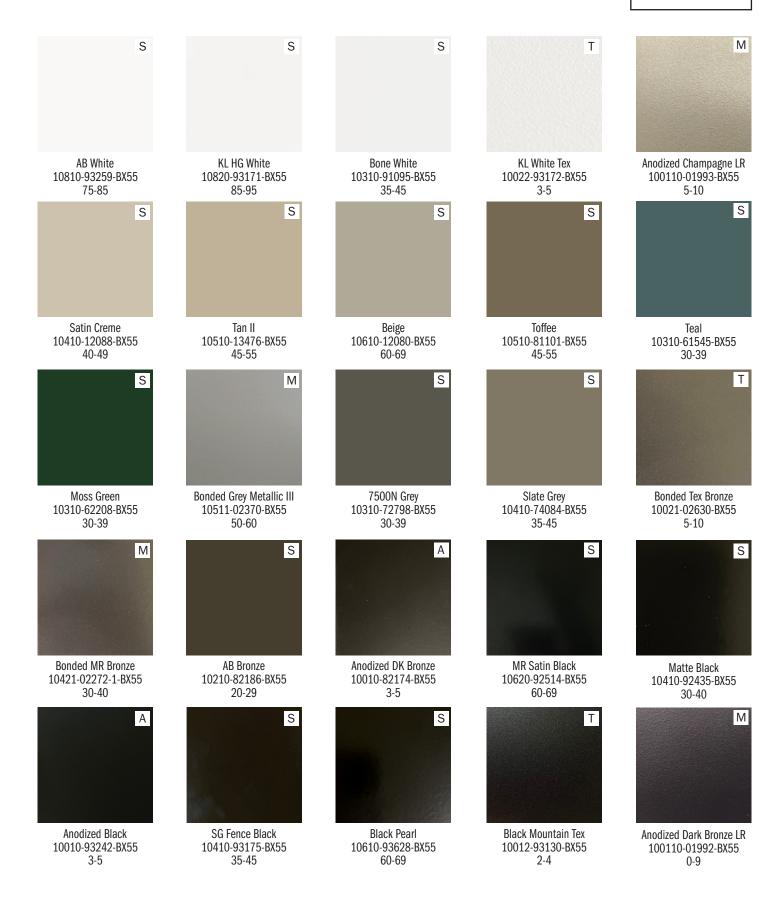

Matching AAMA 2604 & 2605* Colors

Product Name AAMA 2604 Code AAMA 2605 Code Gloss Range

AAMA 2604 Colors

Product Name AAMA 2604 Code Gloss Range

AAMA 2604 Colors

*Non-bonded 2605 orders up to 275lbs have a 10 working day turnaround time

Please note, all non-metallic 2605 products are made to order with a 5-10 Working Day lead-time for orders of 350 lbs. or less. Metallic 2605 products require an 8 week lead-time and have a 250 lb. minimum order size. 2605 products are available in 25 or 55 lb. fill sizes, with a minimum order quantity of 55 lbs. for non-metallic 2605's.

Stock AAMA 2604 RALs

RAL Number Product Name Product Code

These RAL products meet the AAMA 2604 specification. Stock options subject to change, please check with your local TCI sales representative for MTO lead times.

9000 Series

AAMA 2603 Specification

TCI 9000 Series Polyester Systems have the broadest formulating range in color and gloss, and many will meet or exceed AAMA 2603

performance requirements. Products in this series have a 60° gloss range of 5-90° + and meet many decorative and functional requirements for chemical resistance, physical properties, color, gloss, and weatherability. High chroma colors are also available. Typical uses include aluminum extrusions, playground equipment, agricultural equipment, and machinery.

11000 Series

AAMA 2605 Specification

The TCl 11000 Series Highest Exterior Performance Organic Systems are formulated to meet the requirements of the AAMA 2605 specification. Products in this series, with the exception of anodized products, have a 60° gloss range of 25-70° + and are available in many colors. Proper amorphous chromium phosphate or amorphous chromate pretreatment is critical for product performance. Chromium chromate or chromium phosphate coating weights should be a minimum of 40 mg/ft². Alternative chrome and/or non-chrome conversion coatings should be maintained according to supplier's recommendations. A TCl technical representative must audit each application system to ensure products will meet the 2605 specification.

TruDurance

TCI Certified Applicator

TCl field technicians are trained to audit all aspects of the powder coating operation to determine the customer's ability to achieve AAMA requirements. TCl runs a variety of tests that evaluate the performance of our powder coatings in the customer's process and continues with bi-annual renewal audits to ensure the process parameters have not changed without notification. For TCl Certified Applicators, warranties are available for 2603, 2604, and 2605 applications.

10000 Series

AAMA 2604 Specification

The TCI 10000 Series Superior Exterior Performance Polyester Systems are formulated to meet the requirements of the AAMA 2604 specification. Products in this

series have a 60° gloss range of 5-90° + and are available in a wide selection of colors. Proper chrome or non-chrome pretreatment is critical for product performance. Chromium Chromate or chromium phosphate coating weights should be a minimum of 30 mg/ft². Alternative chrome and/or non-chrome conversion coatings should be maintained according to supplier's recommendations. A TCl technical representative must audit each application system to ensure products will meet the 2604 specification.
